Save to Precision

unique in
Erosion

Weipert Small Hole Drilling Machine

The EDM Series for all demands

Weipert Small hole drilling machines

Flexibility and economic

Produce from small drilling

A constant high quality is one of the outstanding characteristics of the Weipert Small hole Drilling machines. The easy construction enable to erode easy and complicated parts and provide for a time and cost-saving production. The operating elements are functional and appropriate for user mounted. The construction of the Weipert SLB based on the operator convenience to deliver an optimum result to the user. Thus the most advanced and efficient processing can be achieved.

Features

- all Machines in over-floor construction
- electrode diameter 0,5 to 3mm
- travels 300x400x350mm
- CE-certification verifies the best possible safety

Technical Description

Weipert SLB

Weipert SLB High exactly, economic producing from Small drilling by Electric Discharge Technology

Tech. Description	Weipert SLB
Elektrode Ø	0,5-3mm
Travel X-Axis	300mm
Travel Y-Axis	400mm
Travel Z-Axis	350mm
Travel W-Axis	300mm
Speed W Axis	30-60mm/min
Rapid feed Z-Axis	120mm/min
removal rate (max.)	300:1
Table dimension	320x440mm
max.generator capacity	30A
Table-Elektrode	380mm
Dielektrikum	25l
Power	3,5kw
weight	800kg

- Drilling from start drills z.B in stainless steel, copper or cemented carbide for wire-cut EDM.
- Microtreatment of e.g. Implant, Chill drillings etc.
- big removal rate
Elektrod length – Diameter
- controlled W – Axis
- space-saving construction

Weipert is worldwide operating Supplier of application systems and Machines for the chip and chipless forming economically, highly competitive and reliably use

New Machines

a little overview about our range. From the simple drilling machine about Lathes and Milling machines up to high precisionbis innovative CNC – Controlet Gantry Milling machine and Heavy Duty Lathes

Used Machines

continuous stand in our 3000m² Stock and exhibition rooms many used Machines for ready and running
